

Interventional Radiology Services at Hillsboro Medical Center

Through our partnership with Dotter Department of Interventional Radiology at Oregon Health & Science University, our interventional radiology team provides full-spectrum image-guided procedures for both inpatient and outpatient environments.

Interventional radiology procedures are generally low risk and can minimize pain and recovery time compared to traditional surgery.

Services include advanced imaging modalities such as computer tomography, fluoroscopy, rotational x-ray and ultrasound to help guide catheters, wires, balloons and stents inside the body to the targeted vessels, organs or cavities to treat individuals for a wide range of conditions.

Interventional Radiology

7th Avenue Medical Plaza
333 SE 7th Avenue, Suite 5200
Hillsboro, OR 97123

Clinic Hours

Fridays, 8am – 12pm

Procedure Hours

of Interventional
Radiology at OHSU
brings comprehensive
interventional
radiology specialty
services to the
community and your
patients.

Meet Our Interventional Radiology Team

Our team of interventional radiologists are accredited in interventional and diagnostic radiology.

Masahiro Horikawa, MD
Medical Director
Interventional Radiology and
Interventional Neuroradiology

Dr. Horikawa specializes in interventional radiology and interventional neuroradiology. His clinical interests include targeted treatments for cancer, vascular disease, portal hypertension, as well as vascular disorders of the cerebrovascular systems. As a scientist, he is especially interested in development of new devices and techniques. Dr. Horikawa's other scopes of practice include, but are not limited to, uterine fibroid embolization, prostate artery embolization, genicular artery embolization, liver/kidney/bone tumor ablation, kyphoplasty, peripheral arterial/venous intervention and lymphatic intervention.

Education and Training

MD, National Defense Medical College,
Tokorozawa, Japan, 2006

Residency: Diagnostic Radiology, National
Defense Medical College, Tokorozawa, Japan

Fellowship: Interventional Radiology,
National Defense Medical College,
Tokorozawa, Japan; Interventional
Neuroradiology, Oregon Health & Science
University, Portland

Ryan Meek, MD
Interventional Radiology
and Interventional
Oncology

Dr. Meek is a sixth-generation Oregonian who grew up near Estacada. He earned his medical degree from Oregon Health & Science University, where he remained to complete a residency in Diagnostic Radiology, and fellowship in Vascular and Interventional Radiology. He is passionate about the full spectrum of interventional radiology, including interventional oncology, portal hypertension, dialysis access interventions, venous disease, peripheral arterial disease, prostate artery embolization, and uterine artery embolization.

Education and Training

MD, Oregon Health & Science University,
2016

Internship: St Mary's Medical Center, San
Francisco

Residency: Diagnostic Radiology, Oregon
Health & Science University, Portland

Fellowship: Vascular and Interventional
Radiology, Oregon Health & Science
University, Portland
